

Explosion-proof Starters

Safe and reliable starting in hazardous applications

C

Explosion-Proof Starters

ISO9001, UL508 & UL1203 (NNNY)

ATEX

Certified Panel Shop

Explosion Proof motor control panel mounted directly to motor and pump frame.

Sprecher + Schuh offers explosion-proof starters for environments covered by the following classifications:

- NEMA:** Type 4/4X, 7BCD, 9EFG
- NEC:** Class I, Div. 1 Groups B, C, D
Class II, Div. 1 Groups E, F, G
Class III
- UL:** Standard 1203
Hazardous (Classified)
Locations
- CSA:** Standard 22.2 No. 25 & 30

Explosion-proof combination starters also comply with NEMA Type 3, 3R, 4 & 4X. Optional ATEX certification is available in Class I, Zone 1, AExd I1B, Exd I1B+H2, IEXEx.

NEMA Type 4, 4X, 7, & 9 protection

NEMA Type 7 enclosures are designed to provide protection against an internal explosion when operated in a hazardous gas environment. NEMA Type 9 enclosures protect from internal explosion in a hazardous dust environment.

Both types must also prevent enclosed heat generating mechanisms from causing external surfaces to reach temperatures capable of igniting explosive gas-air mixtures in the surrounding atmosphere. Sprecher + Schuh explosion-proof starters meet all requirements of both classifications. Inclusive with the selection of these explosion proof starters is a gasket inserted into the flange of the enclosure. This included gasket also gives the enclosures a NEMA Type 4 watertight and NEMA Type 4X corrosion resistance approval.

Starting with the best

At the heart of all explosion-proof starters is Sprecher + Schuh's CAT7 and CAT9 line of motor starters. These starters are compact and offer intermediate sizes to better match specific motor requirements. This equates to generous wiring space and less wasted horsepower capacity.

Top line protection...

Explosion Proof starters are equipped with Sprecher + Schuh's CEP7 solid state overload relay standard. Unlike traditional overload relays that indirectly sense motor current through heater elements, CEP7 solid state overload relays measure motor current directly through integrated current transformers and on board electronics. The electronics provide numerous advantages over electromechanical relays.

Combination starters for protection and convenience

Explosion-proof combination starters can include either a UL489 approved Thermal Magnetic Circuit Breaker (MCCB) or non-fusible disconnect. The MCCB utilizes the instantaneous trip ability of a magnetic breaker for short circuit currents combined with the overload tolerance of thermal circuit breakers for normal starting demands. An MCCB can also be quickly reset after the fault has been cleared.

A molded case switch (MCS) is used in applications requiring only a non-fused disconnect.

Series CAT7 & CAT9

Maximum Horsepower Three Phase				Without Short Circuit Protection	Price	DIM	MCCB Amps	With Thermal Magnetic Circuit Breaker (MCCB)	Price	DIM	With Non Fusible Disconnect	Price	DIM
200V	230V	460V	575V	Catalog No.				Catalog No.			Catalog No.

To order, select equivalent Thermal-Magnetic Circuit Breaker catalog number from this chart. Specify on order, "With molded case switch."

NOTE: Catalog numbers and enclosure dimensions reflect contactors with AC coils. For DC coils, select Coil Code from the DC Coil Code table on page C104 and follow the instructions for modifying catalog numbers.

Larger sizes and reversing starters available. Contact your Sprecher + Schuh representative.

Ordering Instructions

Specify Catalog Number	
Replace (*) with Coil Code	See page C104 See pages C105-C106 See pages C107-C111
Replace (◆) with O/L Relay	
Factory Modifications available	

- ① Dimensional information starts on page C122.
- ② Enclosures have gaskets for outdoor use (Type 4).
- ③ Applicable to 600Y/347V only.
- ④ The short circuit and kAIC is relegated to the contactor's 10kA. Contact your Sprecher + Schuh representative for a higher kAIC.
- ⑤ CAT9-116...CAT9-370 starters are available with "EI" option for PLC interface. Change catalog number to include "-EI". Example: CAT9-116-*-◆-TB175E0 becomes CAT9-116-EI-*-◆-TB175E0. See page C104 for price adder.

Pilot Device Kits – NEMA Type 4/4X/7/9 Applications (For use with Explosion Proof Enclosures)

Kits	Description	Contact Blocks included		Catalog Number	Price
		NO	NC

	RED EMERGENCY STOP Pushbutton Non-illuminated, maintained push-pull, with legend	1	1	XHPPM-BT1A-XNP/ESTOP	710.29
	Mechanical RESET Pushbutton	0	0	XRB	95.05
	GUARDED Pilot Light ③ 120V incandescent, screw terminations		Amber Blue Clear Green Red White	XLAT-GH XLBT-GH XLCT-GH XLGT-GH XLRT-GH XLWT-GH	255.50
	PUSHBUTTON LOCKOUT - Accessory Padlock device to activate pushbutton		~	XHPL	150.23
	OPERATOR PROTECTIVE BOOT Rubber push button cap		Green Red	XBG XBR	51.10
	OPERATOR PROTECTIVE BOOT Rubber selector switch cap		Black	XBSB	51.10
	COMBINATION BREATHER/DRAIN ④ Install on top of enclosure for Breather Install in bottom of enclosure for Drain		Stainless steel	XDBH2	77.67

① Legend Plates are anodized aluminum with engraved letters on black background (XNP).
② STOP has red background. START has green background.

③ One of the NPSM hole locations on the A7 dimensional enclosure could create the need for a short pilot light. Refer to factory for details.
④ Requires purchase of 2 pcs for application of both Breather and Drain.
